#ImportantStuff

This part of the application helps us make sure that our data will be handled in accordance with Twitter's Developer Policies.

Our ultimate goal is to keep Twitter a safe and healthy space for public conversation.

What's not allowed

Some activities (like surveillance) are never allowed on Twitter. Take a look at our restricted uses page. Double-check that your intended use is policy compliant.

Automation guidelines

Docs Community Updates Support

① Basic info ② Intended use ③ Review ④ Terms

How will you use the Twitter API or Twitter Data?

In your words

In English, please describe how you plan to use Twitter data and/or APIs. The more detailed the response, the easier it is to review and approve.

My main agenda is to use it for academic research in order to expand my knowledge in the domain of tweet analysis as well as sentimental analysis. Sentiment analysis gives us insight into the things that automate mining of attitudes, opinions, views and emotions from text, speech, tweets and database sources. However, to fully explore the possibilities of this text analysis technique, we need data visualization tools to help organize the results. Visually representing the content of a text document is one of the most important tasks in the field of text mining.

However, there are some gaps between visualizing unstructured (text) data and structured data. Many text visualizations do not represent the text directly, they represent an output of a language model. In
